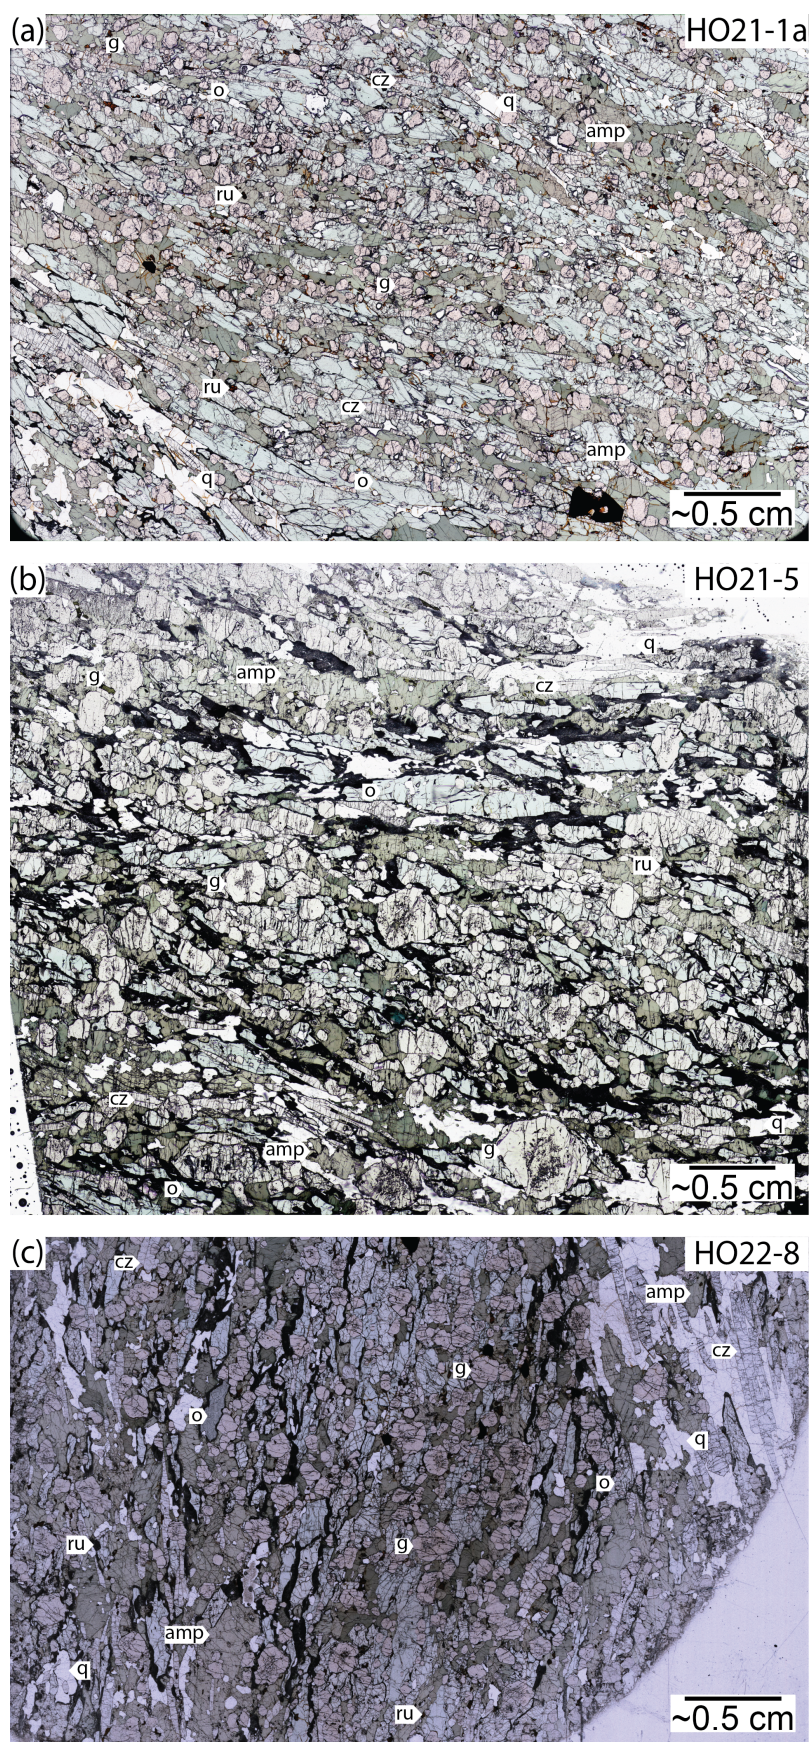

Figure S1: Thin section scans showing modal variability of the investigated samples.

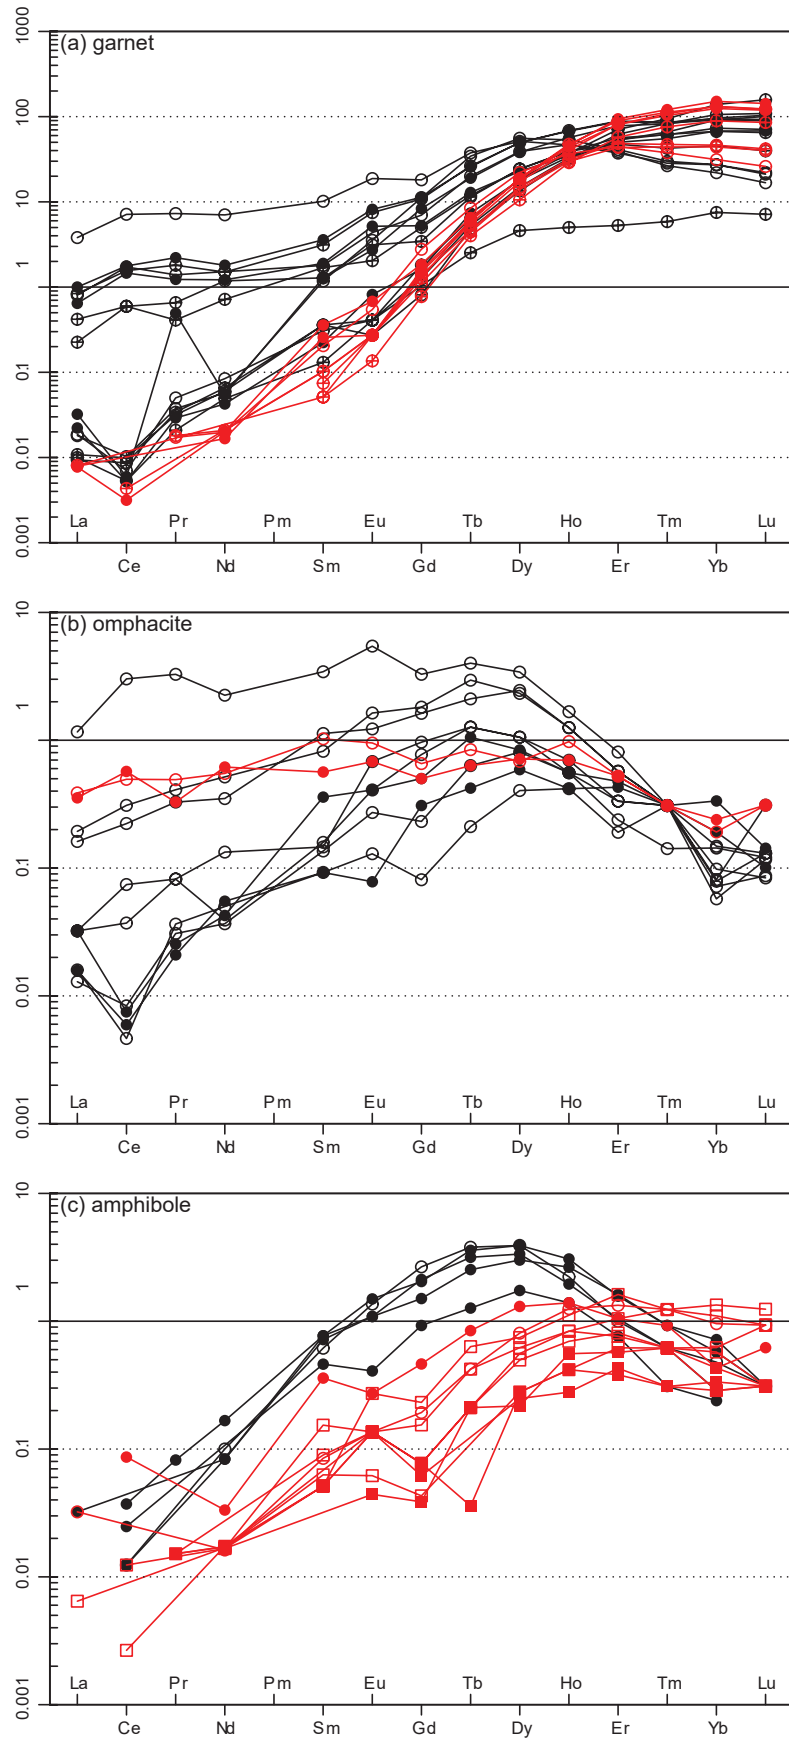

Figure S2: Chondrite-normalized rare earth element spider plots. Black: sample HO22-2, red: sample HO23-1F. Filled symbols are for cores, empty symbols are rims. (a) Garnet. Cross-symbols are for mantle analyses. (b) Omphacite. (c) Amphibole. Dots are for matrix mineral, squares are selvage amphibole.
